Attachment 11

Inspector General's Recommendation, Pages 83 and 84

Recommended DCI Action: a. Approve with modification
b. Approve
c. Approve

Inspector General's Statement

a. The DD/P abandon the concept of the Clandestine Services as a separate and autonomous organization within the Agency, and instead press for acceptance of the Agency as one integral organization with security based upon operational need-to-know rather than organizational compartmentalization.

b. The DD/P accept DD/S personnel as full members of the clandestine team, providing them with such operating information, including counterintelligence information, as may be required to enable them to develop a highly professional clandestine support apparatus.

c. The DD/S take decisive action to eliminate the growing bureaucracy and red

TOP SECRET

tape imposed on the DD/P by the support components, especially in the fields of Logistics and Finance, and that particular emphasis be placed on the reduction of reporting requirements levied against small stations and nonofficial cover activities. In addition, steps should be taken to reduce Agency regulations to manageable proportions.

DD/P Comment

a. Concur with modification: In accordance with the decision of the DCI the CS acknowledges and accepts its role as an integral part of the Agency. We have adjusted our procedures and practices to further this concept and have endeavored to achieve a realistic balance between operational need-to-know and organizational compartmentalization. With all the good will in the world, however, there is no denying the fact that what we do in the CS is markedly different from what is done in other components of the Agency. We will not restrict knowledge of our

TOP SECRET

activities just on organizational lines but we must continue to restrict knowledge on facets of our activities if good operational practice so dictates. This should be acceptable to all members of the Agency.

b. Concur.

c. Concur: The remarks and recommendation of the Inspector General have been discussed with the DD/S who joins me in agreeing with the objective of this recommendation. A continuing effort will be made to eliminate any unnecessary requirements levied on the DD/P by the support components.
